

Michael Steane

Ottawa, Ontario, Canada · 647-327-4195 · steanemichael@gmail.com · linkedin.com/in/michael-steane

Third-year Mechanical Engineering student with hands-on experience in mechanical design, prototyping, testing, and field-based problem solving. Skilled in SolidWorks, technical documentation, safety practices, and design iteration, with municipal engineering experience supporting capital works construction projects.

EDUCATION

University of Ottawa	2024-2028
Bachelor of Applied Science in Mechanical Engineering	

ENGINEERING PROJECTS

Ottawa, ON	2025
Portable Wheelchair Ramp — Client: Ottawa Disability Coalition	
• Worked in a five-person team to design and build a portable ramp for wheelchair users to navigate single steps and curbs safely. • Developed and tested ramp concepts using SolidWorks modelling and basic FEA to evaluate load support and usability. • Built and tested physical prototypes, identifying design issues and improving dimensions, grip, and stability. • Presented the final prototype to judges and the client, receiving positive feedback.	

PROFESSIONAL EXPERIENCE

Brampton, ON	May 2026 – August 2026
Assistant Capital Works Technician - Construction	
• Support construction inspection activities for municipal capital projects, including road resurfacing and infrastructure rehabilitation work. • Assist with field observations, site documentation, quantity tracking, as well as communication with contractors and City staff. • Apply safety procedures and construction standards while gaining experience with asphalt, concrete, grading, drainage, and roadway construction.	

Brampton, ON	2023 - 2025
Parks Keeper - Seasonal	
• Operated municipal equipment and vehicles while following City safety procedures and standard operating practices. • Assisted with inspection, upkeep, and repair of parks, sports fields, and public facilities. • Responded to service requests and reported deficiencies while working in outdoor, team-based field conditions.	

SKILLS & CERTIFICATIONS

Skills:

Software: Microsoft Excel, Solidworks, engineering drawings, basic FEA.

Engineering: Prototype testing, design interaction, failure analysis, technical documentation.

Field & Safety: WHMIS, Occupational health and safety practices, hazard identification, municipal field operations

Certifications:

Standard First Aid with CPR-C — June 2023
